

## Tell me about yourself

Due: Thursday, September 5th in class

**Purpose:** Knowing more about you will help me to tailor the class to meet your needs. Self-reflection has also been shown to have a strong effect on learning. Thinking through these questions will hopefully help put you into a growth-oriented mindset.

**Task:** Tell me about yourself!

1. What is your name and what do you prefer to be called? What are your preferred pronouns?
2. What year are you in at Lewis & Clark? Do you have a declared major?
3. Tell me something interesting or unique about yourself.
4. Tell me about the last math class you took. How did you feel about the class? What did you like most about it? What did you find frustrating?
5. Why are you taking this class? Please tell me as much as you can: What do you hope to get out of this class? Do you have any specific goals? If it is a requirement for something else, tell me about that something else and how you imagine this class helping with it?
6. What do you think will be the most enjoyable part of this course? What do you think will be the most challenging?
7. Is there anything else about you that you want to share?
